

SOCKET SET SCREWS - SQUARE HEAD

Socket Set Screws - Square Head Cup and Half Dog Point Coarse Thread

Square Head Set screws have a large bearing area that provide positive gripping for a hand wrench.

Cup Point screws are fully threaded screws ideal for holding pulleys, collars and other machinery shafts where fine adjustments must be made. Length is measured from under the head.

Half Dog Points have an extended tip that fits into a drilled hole in a shaft. Often replacing dowel pins these screws are used for permanent location of one part to another. Length is measured from under the head to the end of the tip.
