

Chemical Resistant Gloves

SAFETY GEAR

BodyGuard® Unsupported Nitrile Gloves

BodyGuard® gloves provide excellent protection against abrasion, puncture, cut and snag, with an increased resistance to a broad range of solvents, animal fats and other chemicals. A non-slip grip makes wet work easier, safer, and their ergonomic design maximizes comfort. BodyGuard gloves are available in flock-lined and unlined styles in varying thicknesses and lengths for a wide range of applications.

Sol-Vex® Unsupported, Premium-Quality, Nitrile

Sol-Vex gloves are made of a high-performance nitrile compound which provides an outstanding combination of strength and chemical resistance. When exposed to aromatic and petroleum solvents, as well as caustics and animal fats, Sol-Vex gloves have proven to be a superior choice over rubber or neoprene. Sol-Vex gloves won't swell, weaken, or degrade, and they offer better protection against snags, punctures, abrasions, and cuts. As added benefits, Sol-Vex gloves do not promote contact dermatitis, and their component materials comply with FDA regulations for food contact.

Sol-Knit Supported Nitrile

Reinforced nitrile glove combining the durability and chemical resistance of nitrile with the added strength and comfort of an interlock knit cotton liner. This combination results in a tough, flexible glove that resists fuels, lubricants, acids, solvents, and a wide range of other chemical hazards. The Sol-knit gloves stand up to sharp edges and abrasive surfaces better than lightweight neoprene or PVC. The interlock knit liner adds strength and eliminates seams which cause hand irritation and premature wear-through.

- Curved, pre-flexed fingers and wing thumb reduce hand fatigue for extra worker comfort
- Applications include: Chemical processing, oil refining, petrochemicals, food processing, degreasing, machine tool maintenance and cleanup, general maintenance work, graphic arts and printing cleanup, and fishing industry

AlphaTec™

When you work with hazardous chemicals or dangerous liquids, you can't afford any kind of slip. That's why the AlphaTEC glove features the revolutionary Ansell Grip Technology™. Our patent pending nitrile layer is filled with microscopic channels that actively repel oils and other lubricants, giving you nearly the same grip you would have in fluid-free conditions. Combined with an advanced ergonomic design, the AlphaTEC glove greatly increases control and comfort, significantly reducing fatigue and CTS-related injuries. Premium supported nitrile with patented Ansell Grip Technology

Safety Products

Silver Shield®/4H® Gloves

- Resistant to over 280 different chemicals: alcohols, aliphatic, aromatics, chlorines, ketones, esters
- Low cost, disposable gloves do not have to be recycled and can be readily available to workers
- Does not contain chemicals accelerators that can cause allergic reactions
- Ambidextrous
- Can be used as a secondary inner glove. Allows worker maximum protection in heavy duty jobs where the dangers of mechanical damage to gloves are high
