### EAGLE

### Modular Spill Containment Platforms

Eagle's modular platform system brings flexibility to your storage areas. These platforms can be arranged in an endless number of configurations, including in-line, side-by-side, around existing structures or over an entire floor of a storage area. Constructed of blow-molded high density polyethylene for superior strength and excellent chemical resistance. The 1-drum unit has a load capacity of 2,000 lbs. Each 2-drum unit includes two 2 ft. U-channel connection strips to join units together. Each 2-drum unit has a spill capacity of 30 gallons and a load capacity of 5,000 lbs. The 4-drum modular platform boasts a load capacity of up to 10,000 lbs. The optional poly ramp (0200685) is also available.

### Spill Containment Pallets

Feature all polyethylene construction for durability and excellent chemical resistance. For use in storage, transfer, dispensing or collection of hazardous waste. Help eliminate costly cleanups of spills and leaks. Internal and perimeter structural supports for heavy loading. Grating removes for easy cleaning and inspection. Pallet units are forkliftable and have 3/4" drain plugs. Meet EPA 40 CFR 264.175 containment requirements.

## Safety Gas Cans

### EAGLE

### Metal Type I Safety Cans

Eagle Type I Safety Cans, for the safe handling, dispensing and storing of flammable and combustible liquids, feature a deep-drawn, 24-gauge galvanized steel body, a self-closing spring loaded cap which provides tight closure and automatic pressure relief and a non-sparking pour spout and flame arrestor. UL, ULC and FM Approved. Optional HDPE pour funnel (Part 991-F15) fits unleaded fuel tanks. An "F" in the vendor number denotes that a Funnel is included with the Can.
