## We Never Stop Putting More Performance, Safety and Convenience into Every Product

**Original Patented  
Hubbell Locking Device**

### Innovation for Another Industry Standard

For more than 100 years, the Hubbell name has been synonymous with innovation. As a pioneer in the development of new technologies, Hubbell Wiring Device has always strived to improve performance, safety, and functionality across our entire product line. Many Hubbell innovations have become the industry standard for protecting people, increasing value and extending product life cycle for maximum sustainability. Insulgrip® is yet another example of a Hubbell innovation that has become the industry standard.

Insulgrip products are synonymous with Hubbell's ongoing commitment to discovering ways to make products safer and last longer. By encasing wiring devices in tough nylon housings, Insulgrip devices ensure high impact, heat, and chemical resistance while insulating current-carrying components from the user for maximum safety. Insulgrip's cord gripping design clamps conductors, not just the cable jacket, making it the industry's most powerful cord grip with superior strain relief. Each Insulgrip device is manufactured with roomy, separate wiring chambers to insulate conductors and an individually molded face to keep out dust and debris that can cause contamination over time.

**Twist-Lock®**

### Sustainability for a Wide Range of Applications

In keeping with the tradition of innovation, Hubbell expanded Insulgrip even further by integrating the technology into a wide range of plugs and connectors ranging from 15 to 200 Amperes. From commercial and heavy-duty straight blade devices to Twist-Lock®, mechanical interlocks, and pin and sleeve devices, Insulgrip meets a wide range of applications. Hubbell's Safety-Shroud® Twist-Lock® devices further enhance protection and reliability with a recessed design that reduces the chance of inadvertent contact and prevents blades from bending or breaking. The Watertight Safety-Shroud Twist-Lock is ideal for even harsher environments where a watertight seal is critical.

Whether it's ensuring uptime of critical network equipment in the data center, safely moving mobile medical equipment in a hospital setting, connecting machinery in an industrial manufacturing plant, or ensuring safe, reliable power in a harsh food preparation environment, Hubbell Insulgrip wiring devices have you covered. And because they are constructed of only the highest quality materials with features like an exclusive double rivet design for female contacts, bronze terminal screws, and all brass sleeve contacts, Insulgrip devices last longer and better match a facilities' life cycle for optimized sustainability.

## The difference is Insulgrip.

# Insulgrip® Wiring Devices

## Straight Blade 15 and 20 Amp

### Plugs and Connectors

- Durable, impact and chemical-resistant nylon construction ensures reliability
- Integral VARI-SIZE® insert accommodates a wide range of cord diameters (.23 to .72 in.)
- Visible catalog number while in use offers easy identification
- Fast-lead screws provide easy assembly

### Hospital Grade ●

- Powerful offsetting cord clamps prevent strain on terminations
- Available transparent polycarbonate housing allows easy terminal inspection
- Pocketed recess prevents screwdriver slippage for better reliability

### Flanged Inlets and Receptacles

- Equipment mounting flanges fit flush on panel surfaces
- Ideal for applications where a detachable cord is desired
- All nylon construction resists stress cracking and breakage

With abuse resistant and insulating nylon construction, Insulgrip plugs and connectors are built to last.

Insulgrip Hospital Grade plugs and connectors reliably deliver power to vital equipment.

Flanged inlets and receptacles come in multiple NEMA configurations for use in all equipment mounted applications.

# Insulgrip® Wiring Devices

## Straight Blade 30, 50 and 60 Amp

### Plugs

- Ribbed tough nylon housing provides secure gripping and impact resistance
- Heavy duty cable grips accommodate a wide range of cable sizes and prevent conductor movement
- Neoprene dust shield keeps out dust and debris
- Reinforced thermoplastic polyester contact carrier provides heat and impact resistance

### Angled Plugs

- Lower profile design allows equipment to be placed closer to the wall for space savings
- Plug face installs in four-position to match receptacle orientation
- Nylon housing and brass conductors offer reliability and durability

### Receptacles

- Easy identification with visible molded-in catalog and NEMA numbers, ratings and certifications
- Plated steel mounting strap provides corrosion resistance
- Captive Allen head screws and box terminals provide high torque and clamping pressure for larger conductors

Insulgrip plugs and connectors are built to last and provide safety on the plant floor day after day.

Angled Heavy Duty plugs are ideal for kitchen environments that require impact resistance and space savings.

High-amp receptacles can be integrated into raceway and other devices for data center and laboratories.

# Insulgrip® Wiring Devices

## Twist-Lock® 15, 20 and 30 Amp

### Plugs and Connectors

- Ribbed nylon housing provides a secure grip and impact and chemical resistance
- Superior cord grip design protects terminations from excess strain
- Ensures high performance, reliable terminations for maintaining trouble free connections

Ideal for delivering power to all types of industrial machinery and equipment in the factory environment.

### Receptacles

- High-impact nylon face with voltage color-coding resists abuse and facilitates easy identification
- All-brass mounting and grounding system prevents corrosion and offers low resistance ground path
- Over-sized terminals provide strength and resistance against stripping

Provides secure power continuity to critical data center networking equipment, servers and distribution panels.

### Flanged Inlets and Receptacles

- Provides versatile mounting for a wide range of applications
- Easy to wire and available in multiple NEMA configurations

Reliably connects lighting and control equipment on stage, in production studios, and at theme parks.

# Safety-Shroud® Twist-Lock® 20 and 30 Amp

## Plugs

- Ensures safety by confining arcing when connecting or disconnecting under load
- Thermoplastic shroud is impact and heat resistant and protects blades against bending and breaking
- Neoprene dust shield keeps out dust and debris for long-term reliability

Safety-Shroud® design virtually eliminates bent and broken plug blades on the job site.

## Receptacles

- Three styles for maximum versatility with visible keying for quick mating and blade alignment
- Semi-flush option provides the lowest installed profile
- Angled receptacle places equipment closer to the wall for maximum space savings when in use
- Straight receptacle for single-gang boxes provides a low profile when plug is not in use

Protects factory personnel from shock hazards for maximum safety.

Mates with standard NEMA connector bodies found in existing installations.

# Insulgrip® Wiring Devices

## Watertight Safety-Shroud® Twist-Lock®

### 20 and 30 Amp

#### Plugs and Connectors

- Maintains UL Type 4X watertight seal when in use and when disconnected
- Recessed blades provide protection against bending and breaking
- Neoprene sealing gland and thermoplastic guard assure sealing when fully connected
- Catalog number and color-coded voltage are visible when in use for quick, easy identification

#### Receptacles

- One-step self latching spring-loaded cover ensures UL 4X watertight seal while not in use
- Available mechanical interlock maximizes user safety

#### Flanged Inlets

- High-impact thermoplastic housing for heavy-duty industrial environments
- Neoprene closure cap provides environmental seal when not in use for long-term reliability
- Accepts standard NEMA locking connector bodies for maximum flexibility

# Insulgrip® Wiring Devices

## 50 Amp Twist-Lock®

### Plugs and Connectors

- Super-tough nylon housing provides maximum impact resistance for long-term durability
- Stainless steel shroud protects blades against bending and breaking and restricts mismatching
- Interlocking clamp style provides a more consistent, durable grip and better strain relief

### Receptacles

- Thermoset construction is heat and corrosion resistant for harsh environments
- Stainless steel shroud provides maximum impact resistance and durability

### Flanged Inlets

- Zinc plated steel casing is built for maximum durability in heavy-duty applications
- Thermoset high heat resistant interior construction is ideal for high-temperature environments
- Available lift-cover option provides maximum protection in dirty environments

Wiring Device-Kellems

# 30, 60, 100 and 200 Amp Pin and Sleeve Devices

## Plugs and Connectors

- UL listed for maximum safety and flexible interchangeability with all standard UL1686 C1 manufactured devices
- Maintains UL Type 4X seal with gasketed covers and neoprene sealing glands for maximum reliability
- Thermoplastic housing provides insulation and impact, corrosion and UV resistance for the roughest environments
- Larger terminal holes and anti-vibration box terminals ensures easy, secure and reliable connections
- Powerful mechanical cord grip prevents slippage and strain on terminations

Insulgrip pin and sleeve devices are tough and durable for the most extreme applications and harsh environments.

## Receptacles

- Spring loaded gasketed cover for maintaining maximum reliability and protection when not in use
- Hands-free lid-stay allows cover to stay open for easier mating, troubleshooting or maintenance
- Heavy duty cast aluminum, epoxy coated body and cover

Designed to provide metallic shrouding where you want it and a non-metallic housing where you need it.

## Ordering Information

**Style I-** Grounding is achieved through the metallic shroud of the device

**Style II-** Grounding is achieved by dedicated ground pin and sleeve contacts and through the metallic shroud of the device

# HUBBELL

## Insulgrip® Wiring Devices 15 Amp to 200 Amp HUBBELL INSULGRIP® - THE INDUSTRY STANDARD

### Online Virtual Catalog

Find what you need quickly on the Hubbell Wiring Device-Kellems website, [www.hubbell-wiring.com](http://www.hubbell-wiring.com). The online virtual catalog allows you to print, search and download PDFs anytime, anywhere.

### Online Technical Support

Search our knowledgebase for the answer to your technical question regarding Hubbell products, or submit a new question to Technical Support. Browse the customer drawing library by part number or product family. Drawings are available in PDF and DWG format.

### Literature Support

Hubbell offers an extensive literature library for product support. Downloadable PDFs are available online.
