

Self-Supported Pleated Filters

MERV 8 Standard & High Capacity

- 100% Metal-Free Design
- Precision Machine Fabrication and Consistent Quality
- 23% Lower Pressure Drop & 23% Lower Energy Cost
- Patented* - Rugged Structural Design
- Made In the USA

The Self-Supported Advantage

- Reduction in shipping damage
- 100% Synthetic media
 - Does not contribute to biological (mold) growth
 - Does not require a wire backing to retain its shape
- Environmentally friendly
 - Reduces landfill waste
 - Fully incinerable
 - No metal corroding
 - MERV 8 rating may be used for LEED certification points

Applications

Ideal for use in:

Residential
Commercial
Industrial
Healthcare

Distributed Exclusively by:

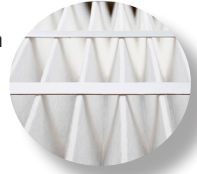

FASTENAL®

Self-Supported Pleated Filters

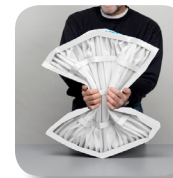

MERV 8 Standard & High Capacity

- Media shall be 100% synthetic media that does not support microbial growth.
- Frame shall be heavy-duty, high strength, moisture resistant paperboard. Frame shall be made with 100% recycled paperboard with an average of 35% post-consumer content.
- Filters shall be of a metal-free construction that can be completely incinerated and does not contain galvanized steel to reduce its impact when land filled.
- Filters shall be rated to withstand a continuous operating temperature of up to 150 degree F and have a recommended final resistance of 1.0" w.g.

Square top pleat design provides added rigidity and improved airflow characteristics

The ProFitter Self-Supported Pleated Filters are engineered to be extremely durable and can withstand considerable abuse resulting from shipping damage and mishandling.
