# A TOTAL COST SAVINGS SOLUTION

**Reduce Product Consumption** – Set controls so that workers only have access to products (and amounts) needed for the job. Track usage by individual, as well as group, job, cost center – up to six levels of information *you* want to know.

**Improve Productivity** – Product is always immediately available to the workers who need it.

**Take Inventory Off Your Books** – Instead of stocking boxes of inventory on your shelves, put the *right* amount of the *right* products in the machine. Through our available consignment plan, you pay only for dispensed items.

**Automate Ordering** – Your local Fastenal store monitors usage online and makes sure the machine is always filled; no labor or paperwork required.

How much could *you* save? Use our cost savings calculator at [fastenal.com](http://fastenal.com) to visualize the opportunity.

## THE FAST SOLUTIONS ADVANTAGE

**NO Capital Expense** – Your local Fastenal store provides and manages the machine. Your only program cost is a low annual software hosting fee.

**A Turnkey Solution** – Fastenal handles everything from machine delivery and installation to product packaging and re-stocking, saving you time and money.

**Flexible Web Reporting** – Use our secure reporting website to manage your machine's settings and view real-time inventory and usage data.

**Easy Installation and Operation** – All you need to get up and running are a 110V outlet and an open Internet connection. Requires minimal effort from your IT personnel.
