FAST Solutions™

Fastenal Automated Supply Technology

FAST 5000SM & FAST 3000SM

Fastenal's **FAST 5000SM** and **FAST 3000SM** solutions allow you to immediately reduce product consumption, on-hand inventory, and administration costs, while providing new insight into usage and spending -- perfect for lean environments and affordable for any sized business.

FAST 4000CTSM & FAST 2000CTSM

The **FAST 2000CTSM** and **FAST 4000CTSM** provide controlled, automated access to individual inserts and round tools. The low cost of the program makes it affordable to install multiple units throughout the shop, bringing the tool crib to the point of use for better productivity.

FAST 10000SLSM

The **FAST 10000SLSM** is our next-generation secure locker system, utilizing sensor-driven cabinets, drawers, shelves and compartments to control a large volume and variety of supplies. The user simply enters an ID and, if authenticated, takes what's needed – the system automatically captures and reports the details of the transaction. With various storage modules available, we can build a solution to meet your specific product needs.

Locker Units

The base **FAST 5000SM** and **FAST 3000SM** units can be equipped with an optional two-unit locker set to vend larger items, manage assets that need to be checked out and returned, and receive "will call" items from your local Fastenal store.

FAST BevSM

Our **FAST BevSM** solution makes hydration products immediately available near the workers who need them, while automatically tracking each transaction to ensure compliance with your hydration program. Just like all FAST SolutionsSM, your local Fastenal store provides the machine and keeps it filled, with no capital investment required.

FAST Scan

FAST ScanSM delivers the time-saving benefits of our VMI services, while keeping you in complete control over ordering and approvals. Print out barcode labels, scan items that need replenishment, and dock the scanner to upload your order to fastenal.com.

FAST Scale

FAST ScaleSM allows you to view your current inventory levels and adjust your min/max reorder triggers online - anytime, anywhere. It's a simple way to reduce monitoring time, eliminate excess inventory, and ensure that you never run out of mission-critical supplies.

FAST Crib

FAST CribSM gives you 360-degree visibility and control over your entire value chain – from inventory & assets management to multi-supplier procurement and proactive maintenance management. With this simple, cloud –based solution, you can see it all, do it all and take your operational efficiency to the next level.

COST SAVINGS

COMPLIMENTARY VALUE
\$250.00

Do you have company initiatives to...

Improve Cash Flow
Introduce Production Line Support
Reduce Procurement Costs

Analyze ABC Costing
Switch to Electronic Invoicing (EDI/EFT)
Consolidate Your Vendor Base
Increase Inventory Turns
Reduce Freight Expenditures
Reduce/Redirect Material Handling
Drive Web-Based Purchasing
Reduce Direct Cost by Sourcing Globally
Lean Initiatives

Bill Becker – Cost Savings Manager, Fastenal Company

Bill Becker brings 37 years of industrial supply market experience to his current role as manager of Fastenal's cost savings programs. In addition to directing the company's internal savings initiatives, he consults with large, multi-site customers to help them introduce value to their supply chains through strategic buyer/seller relationships, efficient materials management, and custom cost savings programs. During this interactive seminar, Bill will discuss industry best practices for vendor managed inventory, cost savings documentation, and buyer/seller collaboration, presenting actionable ideas to streamline paper and product flow to drive down the total cost of inventory ownership.

CUSTOM MANUFACTURING

Need a fastener that you can't find in stock anywhere, or an OEM replacement part? Fastenal's 6-location manufacturing division can quickly produce standard, semi-standard, or custom parts to meet your needs. Our vast materials inventory enables us to expedite delivery times, and our ISO 9001:2008 quality programs and in-house A2LA QC labs ensure that your products will meet your requirements and specs.
