

FASTENAL®

Your Local, One-Stop Earthquake Preparedness Source

Unlike weather-related disasters, earthquakes strike with absolutely zero warning – which is why it's crucial to prepare ahead of time. Fastenal can help. With more than 2,600 stores, including hundreds throughout California and other earthquake "hot spots," we're a one-stop source for the fasteners, tools, and supplies you'll need to minimize damage and injuries when the next earthquake hits.

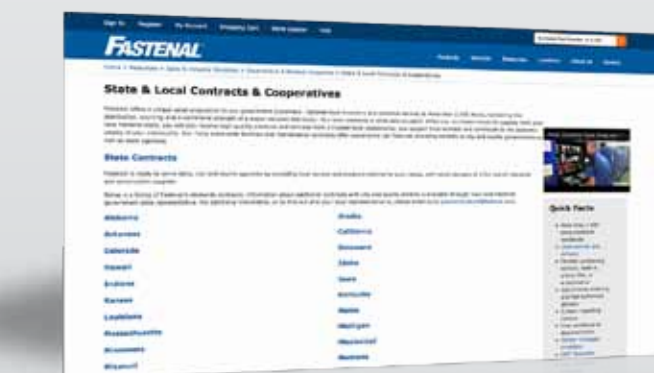

Earthquake Preparedness Basics

Brace shelves, overhead fixtures and equipment, and store loose objects where they won't break or injure employees.

- Install emergency lights and gas leak/carbon monoxide detectors.
- Back up computer data regularly and store back-up files remotely.
- Establish and communicate an employee emergency/evacuation plan.
- Maintain emergency contact information for employees, suppliers, and customers.
- Create an emergency kit containing flashlights, glow sticks, batteries, first-aid/medical items, a portable radio, water, non-perishable food, tools, and other emergency supplies.

Once the shaking starts ...

- If indoors, drop and take cover under sturdy furniture or an interior load-bearing doorway; stay away from windows and glass.
- If outdoors, move away from buildings, street-lights, and utility wires. Stay in the open until the shaking stops.
