VIEW

- Sample Use Cases for Anchor Calculation Accordance
- Tips on How to Navigate and use the Anchor Calculation Software

DESIGN

- Anchor connections in accordance with ACI 318 Appendix D

MODEL

- Attachment with single or multiple anchor points
- Simultaneous moment forces in x-, y-, z- axis
- Minimum edge distance
- Minimum anchor spacing distance

INTERACT WITH

- Real-time 3D graphic models of anchor connections

CALCULATE

- Critical values for total strength design of anchor connections
- Values in US Customary or Metric Units

PREDICT

- Mode of failure for anchor connections

RECOMMEND

- Most efficient anchoring method (adhesive or mechanical anchors)
- Specific anchoring method to achieve a desired failure mode
- Most efficient anchor size

EFFECTICIENTLY RETRIEVE ANCHOR
