

## “GROWTH THROUGH CUSTOMER SERVICE!”

### A Higher Level of Customer Service

At Fastenal, we don't just provide great products; we provide great products in ways that save you time, money and headaches.

Here's what gets “delivered” when you order from Fastenal:

- **LOWER COSTS** through vendor consolidation and value-added services
- **CUSTOM PRODUCT STOCKING** to anticipate your demand
- **A TRUSTED RELATIONSHIP** you can count on to handle your supply needs – every day and when you need it most

### Inventory Management Solutions

With 40+ years of inventory management experience, we can tailor a solution that helps you work smarter and slash costs.

Here's what your Fastenal store can do for you:

- Stock dedicated product for fast lead times and zero stock-outs
- Create a custom bin/storage system that makes your inventory easy to manage and access
- Continually optimize your inventory levels based on targeted min/max levels and actual usage

### Custom Manufacturing

Fastenal's manufacturing division runs 24/7 to meet your needs – from short run specials to high-volume cold headed fasteners. Quality is ensured with 100% material traceability and in-process testing.

### Custom Packaging

Save time and money by having us custom package and label products to meet your requirements. Offerings include kitted parts for specific applications as well as self-contained “install and assembly” kits for products requiring assembly.

### Product Sourcing

If it's available on the market, we can find it. Call your servicing Fastenal store to put our global sourcing strength to work for you. We can also identify and audit new sources capable of meeting your product needs in terms of price, quality and availability.

### Standards and Specifications

- Metric Fasteners and Hardware – ISO, DIN
- Imperial Fasteners and Hardware – SAE, ANSI, ASME, ASTM
- Special Customer Specifications, Prints, Materials & Surface Treatment

### Quality You Can Count On

Fastenal Europe B.V. and Fastenal Manufacturing are ISO 9001:2008 certified. Standard products are fully traceable and purchased through our approved vendor network, which is aggressively qualified with on-site audits, random product testing in our A2LA accredited labs, and ongoing performance analysis.
