

A Higher Level of Customer Service

At Fastenal, we don't just provide great products; we provide great products in ways that save you time, money and headaches.

Here's what gets "delivered" when you order from Fastenal:

- **LOWER COSTS** through vendor consolidation and value-added services
- **CUSTOM PRODUCT STOCKING** to anticipate your demand
- A **TRUSTED RELATIONSHIP** you can count on to handle your supply needs – every day and when you need it most

Inventory Management Solutions

With 40+ years of inventory management experience, we can tailor a solution that helps you work smarter and slash costs.

Here's what Fastenal can do for you:

- Stock dedicated product for fast lead times and zero stock-outs
- Create a custom bin/storage system that makes your inventory easy to manage and access
- Continually optimize your inventory levels based on targeted min/max levels and actual usage

Quality People, Superior Service

We hire, train, equip and reward hard-working people and challenge them to adapt in the field to provide a level of service that's second to none.

- Thousands of employees attend our corporate university each year to enhance their product knowledge and skills
- Fastenal locations are run as true entrepreneurial businesses, providing personal, flexible service that's focused on *your* supply needs

A2LA Lab Testing and Services

Fastenal's A2LA accredited laboratory in Malaysia provides product quality testing to meet your needs, whether you need a product tested to international standards or your own specifications.

Our wide range of testing services includes:

- | | |
|----------------------|--------------------------------|
| • Salt Spray | • Ductility |
| • Hardness Testing | • Torque Tension |
| • Micro Hardness | • Decarburization |
| • Proof Load Testing | • Hydrogen Embrittlement |
| • Tensile Testing | • Torsional Strength of Screws |
